POISON TALE OUTDOES ANY FICTION STORY

C. O. Baring, Wealthy Chemist and Business Man, Charged With Attempted Murder in Wife Poison Case

DESIRED ILLNESS

Prisoner Said to Have Merely Wanted Wife to Become So Sick She Would Have to Take Him to California

White Plains, Apr. 28.—Indictments charging the attempted murder of his wife by poisoning her food with arsenic were returned against Clarence C. Baring, wealthy chemist and business man, today after a grand jury had listened to an astounding recital of events that led up to the denunciation.

Behind the indictments lay a story with a plot and motives as strange as any detective fiction—the story of a man who is alleged to have committed an attempt to bring illness by poisoning upon a wife seven years his senior, that she might take him to California, away from "the other woman." The state maintains he intended death from the poison.

Three indictments were returned. One charged attempted murder, first degree and another the poisoning of food. The third charged technical assault. Baring was held in prison, without bail.

District Attorney Rowland, in presenting his case to the grand jurors, said Baring had admitted having placed in his wife's food typhoid, pneumonia and diphtheria germs and arsenic "to make her so sick that she would have to go to California to recuperate." Emanuel Stindler, Mrs. Baring's lawyer, added that Baring wished to "get away" from a New York woman of 25 in whom he had lost interest, and wanted to make his wife so ill that they would have to go away for her health.

Story Pieced Together.

Eight persons, including physicians, nurses and laboratory workers, who told of giving tubes containing disease germs to a man known as "C. O. Baring," pieced together the curious tale for the grand jurors.

The trail that ended in Baring's arrest started last January when Mrs. Baring, after a series of spells of illness, went to Palm Beach. Her husband accompanied her. Again she was taken very ill. She recovered after a few days and the couple returned home. Several weeks later, in a New York hotel, she had the worst attack she had experienced up to that date. A nurse took charge and she soon was well.

Mrs. Baring told the district attorney that she continued to improve so long as the nurse remained with her, but that she relapsed into illness when her husband took care of her. She said it was then she became suspicious and sent for Dr. Henry J. Baring. The result of his examination, she said, convinced her that her husband was attempting to poison her.

Disease Germs Found About Home.

On April 7, she said, Baring brought her some imported dates. She said Mr. Rowland had appointed a physician in his selection of the dates. He gave her. Again she became ill, she said. She sent the remainder of the dates to Mr. Rowland, who had them analyzed. The chemist reported they contained poison.

Mrs. Baring said she then searched her home and found in a trunk some of fish bowl in which she found that later was learned to be typhoid, diphtheria germs. A physician, she said, told her that the germs had come from the Will of Parker hospital, New York. A few days later another kind of illness was found in the Baring home.

The day that Mrs. Baring told the district attorney that she was suspicious of her husband, she was told by a physician that she had typhoid germs. She was told to have a blood test. The police found that it was typhoid germs. From the Will of Parker hospital, New York, a few days later another kind of illness was found in the Baring home.

AUTO-TROLLEY CRASH DEATH TOLL HAS NOW REACHED FOUR

Albany, Apr. 28.—Statistics that a total of four persons died today in the trolley crash in the city of Albany, New York, were announced today by the city health department.

The crash occurred at the intersection of Broadway and Broadway Avenue, where a trolley was struck by a car. The trolley was carrying a large number of passengers. The car was driven by a man who was also killed. The driver of the trolley was also killed. The driver of the car was also killed. The driver of the trolley was also killed. The driver of the car was also killed.

IMPORTANT BILLS BECOME NEW LAWS

Increase in Safeguards at Railroad Crossings One of Recently Enacted Statutes

Albany, Apr. 28.—Creation of an industrial council of employers and employees, increase of safeguard at railroad crossings in the state and requirements that all persons operating motor vehicles to serve as taxi cabs must furnish an indemnity bond of \$2,500, are three of the most important new laws enacted over the weekend as a result of Governor Smith's approval of bills passed by the recent legislature. It was announced at the executive offices today.

The new statute list, made public today, contains 118 laws, a majority of them being of only local application. Included therein are four bills covering total appropriations of \$10,000,000. The largest single item in the appropriation list is \$35,000 for expenses of the home rule commission in examining the general laws of the state and proposed changes to meet the requirements of the home rule enabling act recently approved by the governor. Other appropriations are for salary increases or payment of minor claims.

There are still before the governor for action about 200 bills, of which 25 are to be made the subject of the hearings beginning on Thursday of this week. The 30-day period which is allowed after adjournment of the legislature for action on measures passed within the last 10 days of that body's existence, will expire a week from next Friday.

BERGDOLL STILL AWAITS PROMISE

Wants to Return and Will If Reliable Offer Is Made Him, Declares Mother

Philadelphia, Apr. 28.—Mrs. Emma Bergdoll, mother of Grover C. Bergdoll, notorious draft evader, said tonight there was no mystery about her son's disappearance from Eberbach. She said that he was visiting relatives in Switzerland and that he would return to Eberbach in about three weeks to reopen negotiations with representatives of the American Legion for his surrender.

She said Bergdoll had informed her of his plans in a recent letter.

Mrs. Bergdoll said that her son had requested her to reopen negotiations with the government for his return to this country, but that so far the government had refused to negotiate.

"If these offers of other organizations had been made by the government officially," she declared, "I know that Grover would be here now. He wants to return, and I know he will if a reliable offer is made. We all expected him a month ago."

Mrs. Bergdoll said her home had been renovated and furnished in anticipation of his return.

REBELS TAKE TEGUCIGALPA AS PEACE PARLEY NEARS

Washington, Apr. 28.— Honduran revolutionists fought their way into Tegucigalpa, the capital, today, just as the state department had been advised that the last of the central American republics had accepted the invitation to participate in the peace conference at Annapolis for restoration of order and constitutional government.

There was nothing tonight at the department to indicate whether acceptance of the capital by the combined revolutionary forces which held it would result in more than a month's delay in settling the conflict. The situation appeared possible that the development must insure a cessation of hostilities and thus help to bring the war to a close. The officials here expected no new danger to American lives or interests to result from the revolutionary victory of Tegucigalpa.

DAUGHTER FURNISHES BOND

Albany, Apr. 28.—A 16-year-old daughter of a man in the city of Albany, New York, has been arrested today for the murder of her father. The father was killed by a car. The daughter was driving the car. The daughter was driving the car. The daughter was driving the car.

22 VICTIMS OF MINE DISASTER HAVE BEEN FOUND

Rescuers Work Six Hours Before Gaining Entrance to Search for Men

LITTLE HOPE FOR 92 OTHERS

Only Chance of Survivors Lies in Possibility of Sealing Air Pocket

Wheeling, W. Va., Apr. 28.—A total of 22 bodies had been recovered tonight from the Denwood mine of the Wheeling Steel corporation, where 114 miners were entombed today by an explosion. Nineteen of the bodies were found by rescue workers in the Brown run shaft while the other three were located in the main passage.

One of the dead miners was identified as George Holliday, Jr., son of the superintendent of the mine. Superintendent Holliday declared that a check disclosed 114 miners were in the mine when the explosion occurred. Ninety-two remained unaccounted for and hope that any may be found alive has been virtually abandoned.

Little Hope For Others.

Only a faint hope was held out by officials of the mine rescue crew for the other men in the mine at the time of the explosion. If any of them escaped being killed outright and had time to barricade themselves in rooms filled with fresh air, some of the trapped miners may yet be found alive, they declared. Upon that possibility rescue crews in short shifts frantically frantically throughout the day and night and had not reached the scene of the explosion tonight.

A temporary morgue has been established at the mouth of the mine at Benwood to care for the bodies when they are brought to the surface. Physicians and nurses stand ready to render assistance to any who are rescued alive.

PACKED OPENING DELAYS WORK

The explosion occurred about three miles back from the drift mouth. Scores of men, women and children soon gathered on a slope facing the entry. They stood in a drizzle of rain, waiting for the rescuers who were digging frantically at the mass of rock which blocked the way into the mine.

After struggling for more than six hours to overcome falls of rock and earth in the drift mouth of the mine, rescuers gained access by way of underground passages by way of shafts. Four bodies, all burned, were located within a few minutes. Two of these miners were alive when found, but they expired before they could be brought to the surface.

FARMER FAILS TO GIVE MONEY; SHOT

Albany, Apr. 28.—Five snipers traveling in a large enclosed motor car tonight shot Daniel Snyder, a farmer, who was driving through the city. Snyder was shot in the chest. Snyder was shot in the chest. Snyder was shot in the chest.

NON-POOLERS ANNOUNCE MAY PRICES FOR MILK

Albany, Apr. 28.—May non-pooler prices announced today for three grades of butter fat in the 20-21% milk solids are: 1st price, \$1.25; 2nd price, \$1.20; 3rd price, \$1.15.

This year's prices show a decline of about 10 cents from the April price while last year's decline was 25 cents. The present quotation is 15 cents lower than May of last year and according to some officials is 25 cents above the 1923 average.

ELITE CONDUCTOR KILLED

Albany, Apr. 28.—William Garrison, 66, an elite conductor of the New York Central, was killed today by a train in the city of Albany, New York. Garrison was killed by a train. Garrison was killed by a train. Garrison was killed by a train.

GOVERNOR M'CRAV FOUND GUILTY OF FRAUD CHARGE

Indianapolis, Ind., Apr. 28.—Governor Warren T. McCray was found guilty of using the funds in furtherance of a scheme to defraud by a jury in federal court here at 9:30 p. m. The case was given to the jury at 8:20 o'clock. Judge Anderson ordered McCray sent to the Marion county jail. He will sentence the governor Wednesday morning at 9 o'clock.

SENATE WOULD CUT OUT TAXES ON MESSAGES

Modification of Corporation Levy Also Voted by Upper House in Advancing Consideration of Revenue Bill

LINE UP FORCES

Smoot Alters Plans and Says He Will Probably Not Retreat Above 35 Per Cent as Sur-tax Maximum Rate

Washington, Apr. 28.—Modification of the corporation tax and repeal of the tax on telegram and telephone messages was voted today by the senate in advancing consideration of the revenue bill. Notice was given, however, that contests would be made later on both of these levies.

The corporation tax was increased from 25 to 35 per cent with the understanding that the capital stock tax would be eliminated. This latter amendment is yet to be acted upon.

Senator Simmons, North Carolina, ranking Democrat on the finance committee, announced that minority members were drafting a substitute amendment, proposing to replace the present corporation tax with one carrying a graduated scale.

STRATTON BEATS POTTER IN DEBATE

Upholds Negative of the Question "Christ Entirely Man Instead of Incarnate Deity"

New York, Apr. 28.—Rev. Dr. John Ross Stratton, pastor of Calvary Baptist church, tonight won a unanimous decision over Dr. Charles Francis Potter, pastor of the West Side Unitarian church, in the fourth of their series of debates on religious modernism and fundamentalism. The question, "Is Christ entirely man instead of incarnate deity?" Dr. Stratton supported the negative.

Dr. Stratton's victory made him even with his opponent, Dr. Potter having won the first and third, and Dr. Stratton the second and fourth, of the five questions proposed to be decided in their series.

Dr. Potter asserted that to accept the doctrine of the deity of Christ "one must leave his reason behind and accept it as an act of faith."

Such acceptance was possible, he said, only by abandonment of reason, which, he said, was an absolute denial of the logic of the universe and of the things which differentiate men from the beasts.

Dr. Stratton, who argued that Jesus was a man, said: "We are not to leave our reason behind. We are to use it. We are to use it. We are to use it."

100,000 PERSONS PASS COFFIN OF TAMMANY LEADER

High and Low Come to Pay Last Respects to Dead Chieftain of Two Decades

STREAM PASSES FOR HOURS

8,000 Pack Cathedral, While 5,000 Others Stand Outside With Heads Bowed

New York, Apr. 28.—One hundred thousand persons high and low, rich and poor, today paid their last respects to Charles L. Murphy, for two decades chief of Tammany hall. Not in many years has the Metropolitan witness a funeral of such magnitude.

The impressive silence of the immense throng was the dominant note. Early in the morning such a crowd had gathered in front of the modest old-fashioned home in E. 12th street, that it took a long time to get the casket to the funeral home.

For hours there was a steady stream of men, women and children, the majority from the lower East side, moving into the parlor where the body lay. Laborers, with lunch boxes under their arms, shop girls, silk-hatted debutantes and women in costly gowns knelt for a moment in silent prayer before the coffin.

8,000 Persons Pack Cathedral.

When the body was taken to St. Patrick's cathedral on Fifth avenue, the cortege passed through streets packed with people, with heads bowed. Here and there the silence was broken by the sobbing of a woman.

More than 8,000 persons crowded into the cathedral where Bishop John J. Dunn celebrated the solemn high mass of requiem. Outside the edifice, 5,000 persons bowed their heads while the ceremonies were in progress.

When the services were concluded and the cortege started for Calvary cemetery, where interment was made, fully 50,000 hushed persons were packed along Fifth avenue. A thousand blue coats lined the route to the cemetery.

The widow, who for two days has been in bed, prostrated, bore the ordeal bravely. Several times her feet faltered, but relatives assisted her.

BANDITS MAKE \$150,000 HAUL

100 Ounces of Platinum and Many Diamonds Taken in Early Morning Robbery

New York, Apr. 28.—Three bandits today attacked, bound and gagged Charles Kresney in his office at a jewelry manufacturing plant in New York street and escaped with diamonds and platinum mountings valued at \$150,000.

The robbery occurred between 1 and 2 o'clock. It was discovered by a foreman at the plant who found on the floor of the office, bound and gagged, Kresney and Josephine Straining, a charwoman. Kresney, who was semi-conscious, was taken to a hospital.

Take 100 Ounces of Platinum.

One wallet of diamonds, which were taken, it was stated, contained some worth \$25,000. Platinum mountings, pieces of jewelry and 100 ounces of platinum valued at \$100,000, also were taken.

The robbery occurred on the seventh floor of an office building in the crowded downtown business section. Kresney, it was stated, was in the habit of going to his plant early in the morning and opening three safes, one in the office of the Fulton jewelry company and two in his own office.

When the charwoman arrived at the Kresney office shortly after 7 o'clock, she told the police she met three short swarthy young men, who ordered her to put up her hands and then bound and gagged her. Kresney had been beaten by the bandits and thrown into a corridor as they hastily hurried up the valueless, she said.

J. S. FASSETT'S BODY AT ELMIRA

Funeral of Former Congressman Will Be Held Today From Late Home

Elmira, Apr. 28.—The body of former Congressman Jacob Sloat Fassett tonight rests in his home, Stratton, this city. Mrs. Fassett, who accompanied the body of her husband from Vancouver, B. C., where Mr. Fassett died unexpectedly April 21, is resting, attended by her children and friends.

The funeral will be held at Stratton Tuesday afternoon at 2 o'clock. The Rev. Hugh C. Burr, pastor, and the Rev. W. T. Henry, pastor emeritus of the First Baptist church, this city, will officiate. The body will be laid at rest at the convenience of the family, in Woodlawn cemetery, this city, the resting place of Samuel Clemens, better known as "Mark Twain," the author.

Among those already here to attend the funeral are former Governor and Mrs. Frank O. Lowden, Illinois; Mr. and Mrs. John W. Dwight, New York. Among the messages of sympathy received by Mrs. Fassett are ones from President Calvin Coolidge, C. B. Slemmons, secretary to the President; former Governor Nathan Miller and Job Hoopes.

A public memorial service will be held Tuesday night at the First Baptist church.

24 NEGRO GIRLS ARRESTED AFTER INSTITUTION RIOT

Mobile, Ala., Apr. 28.—Twenty-four negro girls were arrested after a half-hour battle with state troopers tonight as a result of an outbreak among the inmates of the girls' house of refuge, at Irvington, Pa. The police declared the disturbance was caused by a feud among the girls which has been brewing for two weeks.

Women guards whom the girls accused of "carrying tales" to Miss Emily Morrison, superintendent, were first attacked. Troopers and Miss Morrison attempted to halt the riot, but, finding this useless, sent in an emergency call to state police headquarters here.

State troopers were dispatched to the institution and finally managed to restore order. The girls were taken to the county jail at Mobile.

AMERICAN EXPERTS ARRIVE: ALL MUST PAY, STATES ONE

New York, Apr. 28.—Charles G. Davis of the state of New York and Henry M. Robinson of Los Angeles, members of the reparations commission, arrived today for the rehabilitation of Europe, as agreed upon by the Reparations Commission, to attend the opening sessions of their reparations commission.

They are expected to arrive in London tomorrow. They will be accompanied by a large number of American experts.

The reparations commission was created by the Treaty of Versailles, which required the German government to pay reparations to the Allied powers for the damage done to their countries during the war.

Baseball

AND OTHER INTERESTING EVENTS IN THE SPORT WORLD

MATERIAL IN THE COLLEGE

From College Press America With More to Show Majority of the Track and Field Material from Secondary Institutions.

Instead of bringing out new track and field stars, the thirtieth annual Pennsylvanian Relay Carnival, which was held at Franklin Field on Friday and Saturday, proved conclusively that America will have to draw the majority of its track and field material from the ranks of the hundreds of universities scattered over the land.

There were few outstanding performances in the individual events, but numerous record-breaking were made in between the feeble efforts of inefficient teams. Many institutions sent relay teams to the carnival with but one member capable of turning in a respectable performance, and this member's work was undone before he had got going.

The Penn State two-mile relay team serves as a fitting example. The work of Carter on the first relay was not so bad. He faltered in the home stretch, but so did Marshall, of Cambridge, Massachusetts, running for State on the second relay, ran miserably to say the least. His half-mile could not have been any better than 2:10; for he jogged down the stretch like an exhausted marathoner, and Schuyler Enck was sent off far in the rear. All the Enck and Helfrichs in the world could not undo what had been done in that second relay.

But George Masters, of Georgetown; Tommy Cavanaugh and Louis Welch, of Boston College; Walter Koppich and Bob Moore, of Columbia; Spangler and Argue, of Occident; and Irvin and Bohannon, of Virginia; Chapman, of Yale; Archibald, of Bates, and George Hill, of Pennsylvania, clearly showed that they will be strong contenders for Olympic honors next month. Each one of these men brought much credit to his school almost single-handed.

The Scholastic athletes, the activities of whom occupied the greater part of the two-day program, outdid themselves.

Although there was ideal weather on both days the relays did not play to capacity crowds on either day, yet Manager George Orton is seriously considering the adding of another day to the program in order to accommodate the many entries, which flooded his office from early fall right up until a day or so before the first day of the carnival. A rough estimate places the two-day attendance at between fifty-five and sixty thousand, which is fifteen times as many as attended the first relay games thirty years ago.

CARPENTIER BOUT POSTPONED

Frenchman Will Meet Townley, English Light Heavyweight, at Vienna, May 1.

Vienna, Apr. 28.—The fight between Georges Carpentier and Arthur Townley, the English light heavyweight boxer, which was to have taken place yesterday, has been postponed until Sunday afternoon, May 4. Uncertain weather conditions, following a heavy rainfall yesterday morning, which drenched the open air arena, were given as the cause for the postponement of the bout, although the sun was shining brightly at 4 o'clock yesterday afternoon, the hour when the men were due to enter the ring.

The advance sale of seats had been very poor. The management had hoped to take in six billion crowns, or the equivalent of 1,400,000 francs. The gate receipts at noon, however, promised nothing better than 500,000 francs. Francois Descamps had been promised 450,000 francs for the services of Carpentier and Paul Fritsch, the 1920 Antwerp Olympic featherweight champion, and two other boxers, who were to have shown their wares to the sporting public.

Carpentier and Townley officially weighed in for the bout this morning, and the postponement was bitterly opposed by Descamps, who, having in mind the proposed fight between Carpentier and Gibbons in Michigan City on Decoration Day, desires to get away from Vienna as soon as possible. The Vienna bourgeoisie, who is the stakeholder, was obstinate and insisted that the bout be put off until next Sunday.

Baseball

AS BIG LEAGUERS PLAY IT

WHEN THIS MAN RESULTS

When should a catcher signal for a "waste ball?"

Answered by RAY SCHALK

Catcher, Chicago White Sox; One of the greatest backstops of all time. Has caught in 100 or more games per season for the past twelve years.

A catcher should at all times follow the plays in the field so that he can anticipate what is coming and, when the occasion arises, signal his pitcher for a waste ball. If the catcher is watching the field and sees that a runner is about to steal, or a hit and run play has been called, he flashes the signal for a waste ball. The result, if the catcher is a man of good judgment and brains, is a man thrown out on bases.

WITH A BIG LEAD

PLAY SAFE

OTHERWISE

TAKE CHANCES TO WIN THE GAME

WHEN THIS MAN RESULTS

When ground balls are hit just the infield and come to the outfielder, how should they be handled?

Answered by MAX CAREY

Captain and outfielder, Pittsburgh Pirates. Leads the National league in stolen bases as well as being a terrific hitter.

The method of handling ground balls varies with the conditions of the game. For instance, with nobody on base a ground ball should be blocked and played safe, because such a procedure will give the batter his single, though not putting him in a position to score easily.

If your team is tied with the team at bat, and there is a chance of cutting off an important run, throw caution to the winds and take any chance in holding a ground ball, such as charging it and throwing before you are actually set for your throw. Such measures should be taken only in case of extreme emergency as they are not good baseball—they are desperate baseball.

Holes in One

By Feg Murray

SANDY HERD HAS MADE A HOLE IN ONE SEVENTEEN TIMES!

RECENTLY AT FORT WORTH, TEXAS, JESSE BAUGHN HAD HIS OPPORTUNITY FOLLOWED BY ANOTHER ONE. THE HOLE WAS HUNG IN ONE.

A hole in one is something for a golfer to talk about, but when two golfers make two holes in one on a four-ball match and their partners get three, then having the hole in one, why it's something to broadcast with the loudest of loud speakers.

Jesse Baughn and Earl Aldridge did this on the 137-yard 5th hole at Fort Worth, Texas.

Probably the most famous single hole in one was Jack Henschen's in the 1927 British Open at St. Andrews. We did not see this hole, when he needed it badly and almost got another on the 275-yard 9th hole, for an error in still a favorite topic of discussion at the eleventh hole.

Defies Age

THIS "OLD" JACK QUINN, pitcher for the Boston Red Sox, who hobbled to the mound on April 16 and limped the champions Yankees 9-6.

Many College Players.

Thousands Eligible for Tilden's Place on Tennis Team.

New York, Apr. 28.—Dropping for a moment the baffling question whether William T. Tilden is a writing athlete or an athletic writer, the United States Lawn Tennis association has announced that there are almost 1,000 varsity tennis players in the universities and colleges of the nation from whom to select the Davis cup and Olympic teams of the future.

The intercollegiate schedule was released simultaneously, showing about 500 dual matches in April, May and June, in which 100 schools will be represented. It was emphasized that this year some of the eastern college teams have taken southern tours, but some of the western teams will come east and that one eastern team will go to the middle west for games.

EASTERN LEAGUE

Springfield, 7-11-1; Bridgeport, 5-7-4.

Worcester, 3-6-0; Waterbury, 4-6-1.

Fitchburg, 5-10-2; New Haven, 2-5-2.

Hartford, 9-16-1; Albany, 4-5-4.

SCHEDULE OF TODAY'S GAMES

American League.

Chicago at Detroit.

Cleveland at St. Louis.

New York at Philadelphia.

Boston at Washington.

National League.

Brooklyn at Boston.

Philadelphia at New York.

Pittsburgh at Chicago.

St. Louis at Cincinnati.

COLLEGES SEEK UMPIRES

The leading colleges find it as difficult to engage satisfactory umpires as do the majors and minors. Yale, Harvard and Princeton are making an effort to get a regular staff that will shift around as do the league umpires.

TO MAKE RUTH BEHAVE

To insure good behavior, Babe Ruth's contract with the New York Yankees provides that half his salary shall be held out on him until the end of the season.

AMERICAN LEAGUE

DARKNESS SHORTENS GAME

Boston and Washington Tied at End of Seventh Inning.

Washington, Apr. 28.—Darkness due to an approaching storm ended the game between Boston and Washington today after seven innings with the score tied 2-2. It was a pitching duel between Marberry and Ferguson.

B. H. F.

Boston 000 002 0—2 6 1

Washington 000 001 1—2 6 1

Batteries — Ferguson and O'Neill; Marberry and Ruel.

STONER WINS ANOTHER

Takes His Third Game in As Many Starts This Season, Tigers Winning 7 to 2.

Detroit, Apr. 28.—Stoner won the third victory in his third start of the season today, Detroit making it three straight from Chicago, 7 to 2. Robertson, who won fame by pitching a no-hitter, no-run game against Detroit, was driven from the box in the third inning when the Tigers made four runs on a quartet of singles, a base on balls, a double steal, and a pair (throw by Barrett).

Chicago 010 000 100—2 7 11 1

Detroit 024 000 100—7 11 1

Batteries — Robertson, Connolly and Crouse; Stoner and Baasler.

RUTH GETS TWO HOMERS

Yankees Take Slugging Match From Philadelphia, 11 to 6.

Philadelphia, Apr. 28.—New York won a slugging match from Philadelphia today, overcoming a five-run lead to take the game by an 11 to 6 count.

Babe Ruth hit two home runs during the contest but no one was on base on either occasion. This made a total of five circuit drives for him this season. He also accepted seven chances in left field without an error.

New York 000 010 310—11 16 1

Philadelphia 401 010 000—6 11 1

Batteries — Shawkey, Jones and Hofmann; Helmach, Harris, Baumgartner and Perkins.

BROWNS WIN IN NINTH

Pinch Hitter Pitches Out Necessary Single to Send in Winning Rally.

St. Louis, Apr. 28.—St. Louis took the third game of the series with Cleveland today when Evans, pinch hitting for Jacobson in the ninth inning, drove one to bring in the winning run. The score was 7 to 2. Stephenson drove out a home run and Speaker pounded a three-bagger.

Cleveland 000 200 010—3 9 4

St. Louis 100 010 011—4 13 0

Batteries — Edwards and L. Sewell; Danforth and Seaver.

AMERICAN ASSASSINATION

St. Paul, 3-6-0; Columbus, 14-15-3.

Minneapolis, 7-8-0; Toledo, 1-10-4.

Kansas City, 1-8-0; Indianapolis, 7-11-0.

Milwaukee, 16-15-1; Louisville, 2-6-7.

MRS. JAMES H. FRISBEE DIES

Born in 1853 and Had Spent Entire Life in Delhi Vicinity.

Delhi, Apr. 28. — Mrs. James H. Frisbee died at her home on the Frisbee homestead farm on the Bloomville state road Saturday night after a long period of failing health. Her maiden name was Nannie McMullen, and she was born in the town of Delhi May 4, 1853, having lived in this vicinity all her life. She is survived by her husband, one daughter, Miss Jennie Frisbee, and a sister, Miss Sarah McMullen, who resided with her. The funeral will be held Tuesday at 2 o'clock and will be conducted by her pastor, Rev. W. C. Robinson. She will be buried in Woodland cemetery.

O. E. S. Holds Banquet.

Wataga chapter, O. E. S., held a banquet last Friday evening in honor of the official visit of Right Worshipful District Deputy Mrs. Myrtle Parker, and Assistant Grand Lecturer Cyrus Lincoln of Walton to the chapter.

Presbyterian Delegates to Speak.
Delegates from a number of the Presbyterian churches in the county are to speak in the Second Presbyterian church on Sunday, May 18, at meetings to be held in the afternoon and evening. These addresses will be especially to young people.

I. O. O. F. Celebrates Anniversary.
In celebration of the anniversary of the founding of the order, the local I. O. O. F. held their annual banquet Friday evening, followed by speech making. Hon. A. L. O'Connor of Hobart and H. J. Hewitt were the speakers. There was a large attendance and the usual fraternal good time resulted. The banquet was served by members of the Rebekah lodge.

Personal.
Frederick Wardwell of Oneonta has been spending his Easter vacation with his brother, Leonard, at George Smith's, Orchard street.

MILFORD CENTER EVENTS

Home Church Meets Thursday for All.

Milford Center, Apr. 28. — The Home church will meet Thursday, May 1, for an all day session at Mrs. W. G. Wright's. Beginning at 10 o'clock the time will be given to a millinery lesson. In the afternoon, will be the last lesson in nutrition. Bring something for lunch. All members are urged to be present and an invitation is extended to anyone who may be interested in the work.

Personal and Local.
Mr. and Mrs. Emory Lamm and daughters, Lena, and Grace of Pitts-

Tells Gospel Truth To Benefit Women

Women everywhere who have tried it know that when suffering from nervousness, such headaches, "hot flashes," dizziness, constipation, pain in the back or ailments peculiar to their sex, nothing gives such quick and welcome relief as a few doses of Dr. Kennedy's Favorite Remedy.

A safe, pleasant and time-tested treatment, successfully used for more than 25 years. No dangerous minerals or harmful habit-forming drugs—but a pure and old-fashioned vegetable medicine that builds nature in a healthy condition, and promotes a strong healthy condition.

Large bottles of Dr. Kennedy's Favorite Remedy can be obtained from any good druggist at very little cost. The first few doses prove its value.

very ill for some time, to slowly recovering. Her daughter, Mrs. M. J. Mallory, of Laurens, who has been caring for her, has gone home for a few days to make preparations to move. Mr. and Mrs. Alger home with her. Their many friends regret their leaving this community, where they have lived for a great many years. The best wishes of everyone go with them.

Mrs. M. Fumher of Otsego, who purchased the James Rowland farm, is making extensive repairs to the buildings.

BECOMES ILL AT FUNERAL

Mr. Spencer, Father of Mrs. Alonzo Hood, suddenly died. — Mr. Spencer, aged father of Mrs. Alonzo Hood, was taken suddenly ill while attending the funeral of Clark Pierpont at West Burlington, Sunday.

Steam Shovel Moved.
The steam shovel which has been working on the Morris-Garrattville state road, near Elm Grove was moved Saturday to the hill near Garrattville.

Moving Pictures at Garrattville.

Moving pictures will be given in Breese hall on Thursday evening of every week, beginning May 1. Lee Parker of Edmeston is the manager.

Will Serve Roast Pork Supper.
The Home Bureau club of the Methodist church society will unite and hold a roast pork supper in the club rooms in the Breese block, Friday evening, May 9th. Supper from 5 o'clock until all are served.

Ill With Pleurisy.

Mrs. Abbie Hinman is confined to her bed with an attack of pleurisy.

Personal Mention.

Miss Marion Lasher returned to her home at Sidney, Sunday, after spending her Easter vacation with her grandparents, Mr. and Mrs. C. C. Rockwell. — Mrs. Stephen Tremlett and son of Herkimer are spending the week with her father, Eber Hinman. — Mrs. Earl Hoke of Laurens is helping care for her grandmother, Mrs. Abbie Hinman. — R. Rogers, one of the state road workers has rented Mrs. Minnie Pease's place and moved the first of the week. — Attorney Elias of Earlville, was in town recently on legal business. — Miss Fannie Carleton of Hurleyville, who has been spending her Easter vacation at her home, returned Sunday.

PORTLANDVILLE.

Portlandville, Apr. 28. — Mrs. G. B. McLaury will entertain the Sewing circle at her home on Wednesday afternoon. It is desired that there be a good attendance as there is important business concerning the work planned for the year. Friends of the society are invited.

Dinner at West Oneonta.

West Oneonta, Apr. 28. — The Woman's Mite society of the First Baptist church will serve dinner Wednesday at the church.

Delmonore County News

WILL INSTALL FIRE ALARMS

tamford Contracts for System Which Promises to Be Efficient—Store Building Sold at Auction.

Stamford, Apr. 28. — The Harrington-Seabury Fire Alarm Telegraph company of Moline, Ill., has contracted to furnish and install a fire alarm system for Stamford village at a cost of \$2,500. The system is to be installed within 20 days after its arrival at Stamford, and it is expected to be in operation within the next 60 days. The alarm consists of a three chime whistle which it is said can be heard about ten miles. There will be three signal boxes and the master box will be installed at the telephone office. An alarm of fire can be sent from one of the three signal boxes or on a telephone call to the central operator the alarm will be sounded. The village has been divided into ten fire districts, each to have its whistle call. One long whistle will announce a fire in the West End; two long blasts will mean a fire in East End, and other whistle signals will denote the section of the village where fire has broken out. The firemen have raised about all the

money to pay for the alarm system. It will supply a greatly needed addition to our village fire department, which is well equipped with modern fire apparatus, including a powerful pump engine.

Store Building Sold at Auction.

The residence and store building occupying the site on Main street where the Dr. S. E. Churchill Memorial library building is to be erected was sold at public auction Saturday morning by the board of education. The building was purchased by Contractor H. S. Hall for \$35. Mr. Hall, by the terms of the sale, must remove the building from the site within ten days. Mr. Hall will move the building to his lot on South street, adjoining his factory.

Purchases Building Lots.

Harry Effner has purchased of John Shaw several desirable building lots located on Prospect and Liberty streets. The lots are offered for sale to home seekers. The East End section is enjoying a general improvement. Several residents have recently installed electric lights and as soon as the sewer line, now being built, is completed all residents will connect

with it and many plan to make further improvements to their property. Work on the sewer line is progressing fast and it will soon be completed.

WM Build New Residence.

Eugene Hager, who purchased a lot on Prospect street of the Kirkner estate, is planning on erecting a residence.

Clean-Up Week.

The week beginning May 5 is to be clean-up week, when Stamford residents are invited to clean up their property and the street force will carry all rubbish away. Many sections of the village are greatly in need of a clean up, especially around the railroad station. The fire ruins of the Wood lot should be cleaned up and the street force will make an effort to "clean-up" as it helps the village.

Improving River Street.

The street force is engaged in lowering the hill in front of the Hotel Perla de Cuba, River street. The grade of the road will be lowered about two and a half feet.

New U. & L. Timetable.

A new timetable went into effect on the Ulster & Delaware railroad Sunday. Passenger trains arrive and depart about an hour earlier than former schedule.

Plans Hotel Re-opening.

Manager H. H. Mace of Churchill hall and Revere hotel has arranged to open the hotel for the summer season.

Death of Dr. C. B. Patterson.

Dr. Charles B. Patterson died at his home in Augusta, Ga., April 19, aged 56 years. He was associated with the hospital in that city and is survived by his wife, Minnie E. Gilbert Patterson, a daughter of the late Hon. F. R. Gilbert and sister of J. R. Gilbert of Stamford.

NEWS FROM FRANKLIN.

Attend Graduating Exercises at Hackensack — Other News Items.

Franklin, Apr. 28. — Rev. and Mrs. Harlow W. Parsons accompanied W. H. Bush to Hackensack, N. J., Monday, and will be the guests of Mr. and Mrs. Bush during the week. Mr. Bush goes home to attend the graduating exercises of his daughter as a nurse.

Home From Porto Rico.

Mr. and Mrs. George T. Coxhead, who have been spending the winter with their son in Porto Rico, returned to their Franklin home last week.

Epworth League Play.

"The Minister's Wife's New Bonnet" was given by the Epworth league last Friday evening. Saturday evening they played it at Treadwell.

Jacksons Home From Florida.

Charles Jackson and family and Mrs. Ida Bennett and sons, Orrin and Floyd, have returned from Florida, where they spent the winter.

Franklin Personals.

Henry Newell of Towanda, Pa., has been spending a few days with Franklin relatives. — Judge L. F. Raymond was in Norwich last week. — J. L. Whitman of West Clarksville is spending some time with his daughter, Mrs. Mary Ann Whitman, in Franklin. — Mr. and Mrs. Emory Root.

GREET RETURNED NEIGHBORS.

Mr. and Mrs. E. V. Metcalf and Mr. and Mrs. R. W. Ballantyne spent Winter in South.

West Davenport, Apr. 28. — A large company of friends assembled at the home of Mr. and Mrs. L. V. Metcalf Thursday evening, giving them and R. W. Ballantyne and wife a welcome home after their five months' sojourn in the south. The two ladies were each given a choice potted plant and the other members of the families received other gifts. Choice refreshments were served.

Ladies' Aid Society to Meet.

The Ladies' Aid society of the Methodist church will meet Thursday for supper at the home of Mrs. C. McLaughlin. Mrs. McDonald, Mrs. W. H. Allen, and Mrs. Adalbert Holmes compose the supper committee.

Will Open Blacksmith Shop.

Maurice Jacques has moved here from Bloomville and expects to open a blacksmith shop.

Birth.

A son was born this morning to Mr. and Mrs. Ray Smith.

Personals.

Anel Rathbone and little daughter, Virginia, and Miss Mabel Fish, are sick with the measles.—Orrin Grooms and family, and Mrs. Thomas Mincher of Ulster, were week-end visitors at C. E. Mickle's.—N. J. Warfield and family, and L. Campbell and wife of Badcock, Norman, Cooper and wife of Schenectady, Mrs. E. Kenyon and Miss Mildred Simmons of Oneonta, were guests Saturday and Sunday at William Oles.—M. Adler and H. Wistand have been in New York the past few days on business.—Mrs. G. Miller of Oxford is visiting her daughter, Mrs. J. Bates.—Mr. and Mrs. Frank Hoxford of Brooklyn were in town on business Saturday.

INURED PEOPLE IMPROVING.

Mrs. Susan Cowan and son, Robert, are by U. & D. Train in Hobart.

Hobart, Apr. 28.—Mrs. Sam Penfold of Delhi is spending several days here with her sister, Mrs. Susan Cowan, who is making a good recovery from the injuries she received when she and her son, Robert, were hit by the Ulster & Delaware train at the Maple avenue crossing Friday evening.

Personals and Locals.

Edwina Johnson was accompanied to Oneonta Saturday by her parents, Mr. and Mrs. Johnson, where Edwina entered the Fox hospital for an operation for mental trouble. Late reports are she is doing well.—Mrs. Rex Bettsman is ill at her home on River street.—Rev. and Mrs. D. S. Haynes and family are visiting relatives in Sidney and Ulster.—Mr. and Mrs. Donald H. Grant of Oneonta are guests of Mr. and Mrs. R. H. Grant.—George Galley and Everett M. Adams left Monday morning for a business trip to Terrytown.—Mrs. Marion Southwick returned Monday from Champlain, where she spent the Easter vacation with her parents.—Frank Campbell is out again after a week.

WALK-OVER'S FIFTIETH ANNIVERSARY

Walk-Over

The impossible, men, smooth grain leather!

Glass Grain—it's called—a leather that looks grained, and it, but it feels smooth! It's light weight, for spring and summer, but built for heavy wear. It's the Delmar, in an unobtainable Fiftieth Anniversary style, with unobtainable Walk-Over quality and wear built into it, at a price that needs no adjectives.

LOCAL MENTION

—D. & H. paymasters arrived in the city last evening and today will deliver checks to the employees of that company.

—Charles Hooks, arrested Sunday for speeding, paid a fine of \$10 when arraigned in city court yesterday morning.

—Representatives of all the veteran organizations in the city will meet in the Municipal building at 7:45 o'clock Friday evening to discuss plans for Memorial day.

—J. S. Dauley is making some improvements about the grounds at his residence on Dietz street. A cobblestone driveway is being constructed on the north side of the residence.

—The local D. & H. offices yesterday went on daylight saving time to conform with the practice of the general offices in Albany, working from 7 until 4 o'clock with the lunch hour at 11:40 o'clock.

—Winfield Stockman of Unadilla, arrested Sunday for reckless driving following an automobile accident in which his car was involved, was fined \$50 by Judge VanWert in city court yesterday.

—Wednesday, May 7, will be observed as Mothers' day by Oneonta lodge of Elks and at the regular meeting on the evening of that day there will be a program appropriate to the occasion.

—Since the first of this year \$2,777 in property has been recovered by the local police department, a record quite enviable. Most of this sum was in stolen property, the balance being \$20 which was lost, and recovered by the department.

—E. J. MacEwan, secretary of the Chamber of Commerce, and Daniel Franklin left yesterday afternoon in the car of the latter for New York city in the interest of securing new Oneonta industries. They will probably be detained only a day or two.

—But two days are left for the payment of water rents without the payment of fees. Rents are due at the office of the city chamberlain in the Municipal building, and persons must present their yellow slips, mailed out several weeks ago, in paying.

—Readers of The Star who are also the fortunate possessors of radio sets will be interested to note that Charles Ross Taggart is to broadcast this afternoon from WJZ, New York, at 4:15. Mr. Taggart, "The Country Fiddler," is pleasantly remembered for the delightful entertainment which he gave on February 29 at the Oneonta club.

—Mrs. Bernard Richardson of Spruce street had the misfortune to fall down three or four of the cellar stairs at her home Saturday afternoon last and sustain a serious fracture of the right wrist. She was given first aid by the Oneonta hospital from which institution she expects to return to her home today.

—Many of the "Y's" Trout Fishermen's club will be out on the streams today. It is planned to have a trout dinner at the next meeting of the club to be held at the association building on Wednesday evening and, like the boy when the preacher was expected, the streams are reported setting down within their channels and some good catches are anticipated.

Meetings Today

Special meeting of the P. H. C. will be held this evening with Mrs. W. Linares, 96 Chestnut street, at 8 o'clock.

The Red Cross Baby clinic will meet this afternoon from 3 until 5. Dr. L. F. House will be in charge.

The Modern Woodman of America will meet tonight, in K. of P. hall, at 7:30.

The Past Masters' club, O. E. S., will meet this afternoon and evening at the home of Mrs. A. O. Ingerham, 70 Spruce street.

Regular meeting of Centennial lodge, No. 447, I. O. O. F., this evening at 8 o'clock. Work, third degree.

Special meeting of Oneonta Chess and Checker club at Y. M. C. A. at 7:30 o'clock this evening to arrange for a match with former chess champion of state.

Albany Kiwanis Bowls Here Today. There will be a bowling contest at the Y. M. C. A. building this evening between teams from the Albany and Oneonta Kiwanis clubs. Bowling begins at 7 o'clock. Daniel Chase, president of the Albany Kiwanis, is expected to represent his team.

You will find Mah Jongg glasses with flesh tint lenses just as comfortable and restful to the eyes when driving or walking in bright sunlight. Miller prescribes them for sensitive eyes. 12 Central avenue. Phone 154-W2.

Funeral orders, either cut flowers or designs, ordered from the Derrick Flower shop, insures fresh flowers and most artistic arrangement; on time delivery, and perfect satisfaction. Derrick, florist, Theatre building. Phone 79-W.

Coffee Decides to Play

At Tilly's hall in St. Vidon, Friday evening of this week. Round and square dancing, refreshments, best music. Come and have a real good time.

Mothers' day, Sunday, May 11, less than two weeks away. Let's have your order early to avoid disappointment. Derrick, florist, Theatre building. Phone 79-W.

Big time for all members of Moose at meeting Wednesday evening, April 20, at 7:30 o'clock sharp. Initiation, installation and banquet at Oneonta hotel.

Are you ready for that attack of indigestion? You are if you have a bottle of Royal I. Coffee on hand. See it at the

OWN YOUR OWN HOME WEEK

Oneonta Real Estate Agency, Wholesale and Retail Mortgages, Corresponding to Big Democracies for Next Week.

Next week will be Own Your Home Week in Oneonta and extensive plans are being made by the committee in charge for a demonstration that will show conclusively the advantages and benefits of actually owning that place so dear to all—the building which houses that intangible thing called home.

The demonstration will be built around an educational film called "The Great Idea," which will be run at the Oneonta theatre on Monday, Tuesday and Wednesday evenings.

This film concerns the experiences of a typical American family living at first in such an apartment as may be found in any medium sized or large city. The trials and tribulations of those who must rent are set forth.

The longing of the family for a home of their own is set forth. Finally it is decided to build and at last the "perfect house" is under construction. Each step is shown and the audience is given full opportunity to study the various materials which go into home construction, and to absorb many useful hints regarding the furnishing of the home.

Various obstacles are overcome and at last the home is completed and the family, more or less broken up, is reunited. Before the curtain goes down on the drama it is realized that the hero is a changed man and the audience has learned a lesson, not alone of bricks, studs, mortar and plumbing, but one in which the natural instinct for home ownership is pictured as having aspects of an even higher nature.

Local merchants will cooperate by appropriate display of goods for the home and on Monday The Star will issue a special 16 page Own Your Home edition, containing, in addition to advertisements of sellers of building supplies and articles of all descriptions for the home, many columns of matter relating to home building and furnishing, adequately illustrated. On Saturday of this week booklets will be distributed from house to house, containing a synopsis of the play and pictures of the most perfect house in America, shown in the movie.

EX-STATE CHESS CHAMPION

Will Play Field of Local Men at Y. M. C. A. Friday Evening—Has Defeated Capablanca.

Roy S. Black of Syracuse, ex-chess champion of New York state will visit Oneonta on Friday next at the invitation of Roscoe C. Briggs, an old friend, and, if sufficient interest is aroused, will play simultaneously from 12 to 20 men at the Y. M. C. A.

Such a stunt has never before been tried in Oneonta and it is hoped that many chess enthusiasts will take advantage of the opportunity to pit their skill against that of a master of the game.

Those desiring to enter the match are asked to phone their names to the Y. M. C. A. or to Frank Johnson, tournament manager of the Oneonta Chess and Checker club, 81 Brigham's jewelry store. It is requested that each man participating bring his own board and chess men. The public is cordially invited to witness the match and no admission will be charged.

Mr. Black is ex-champion of the state and was for seven years champion of the Brooklyn Chess club. He has won two state matches with English teams and in 1912 defeated the great Capablanca, one of the greatest chess players the world has ever produced.

PRACTICING FOR MATCHES

Company G Members to Compete for Places on Tenth Regiment Rifle Teams.

Members of Company G are spending strenuous hours on the range these days in preparation for competition matches to be held in the near future. On May 13 representatives from the companies at Kingston and Walton will be here to compete against Company G men in an elimination match for places on the team to represent the second battalion in the elimination match to be shot at Albany.

The Tenth regiment team, which will compete in the state matches in June.

On May 11 picked men from the local company will go to Albany to shoot against men from the other units of the Tenth for places on the regimental team which will oppose the team of the Twenty-Sixth U. S. Infantry at Pittsburgh.

Interest in the approaching matches is keen and men are on the range each week practicing intensively. Captain Louis M. Baker is confident that his men will make a creditable showing in both events.

PROSPECTIVE INDUSTRY

Directors of Chamber of Commerce to Consider Chocolate Project.

President L. C. Lauren of the Oneonta Chamber of Commerce has called a special meeting of the directors for this afternoon at 4 o'clock, at which time there will be a conference with a representative of a chocolate industry, which is considering locating in this city.

There is a building available for the new enterprise and with the demand constantly increasing for this product it is believed that there are good prospects for the project. The industrial committee of the Chamber has been doing some effective work and it is believed that some tangible results will soon develop.

VERY SUCCESSFUL OPENING

St. Mary's Bazaar Opened Last Evening With Glorifying Festivities and With Wealth of Fun for Those in Attendance.

To show that money can be made in abundance while all those in attendance are getting their full measure of fun and enjoyment is perhaps a difficult task, still one chosen by St. Mary's parish of this city as a reward for their new parochial school. And how well they succeeded can only be told by those who attended the opening of their bazaar last evening, all of whom were enthusiastic over the many novel entertainment features which had been provided.

Despite inclement storm conditions furnished music for dancing from 9 until 12 o'clock last evening, as they will every evening of the week, and the school auditorium was well filled with dancers.

Tickets are being sold for the Italian supper which is to be served on Thursday evening, and the demand is particularly strong for that evening. However, more than 100 persons were well served at the chicken frieze supper served last evening, and larger crowds were expected for the supper every night.

Many Inspect School Building

There were many residents not only of Oneonta but of the surrounding district who availed themselves last evening of the invitation of the parish to inspect the new school building, at the corner of Elm and Walnut streets, and for those who desired, guided lead the way throughout the excellent structure.

The building is of fireproof construction with all walls built of hollow tile, and with all trimming of wood eliminated as far as possible. The size of the auditorium was a revelation to those who had not before been inside of the building, as was the light and airiness of all of the class rooms.

Eight class rooms are already provided, with allowance made for the addition of two more over the auditorium. Office rooms and corridors are of course of ample room, while the toilet rooms, shower rooms, both for the boys and girls, with many individual lockers, are features which are equipped with the most modern accessories.

However, no verbal description can do justice to the new building, and the most cordial of invitations is extended to inspect the school, whether interested in the purchase of bazaar articles or not.

Booths Do Rushing Business

All of the beautifully decorated booths were well patronized last evening with scores of bargains offered. Still, so large is the supply of donations that the stock rooms which contain many times the quantity of articles which can be accommodated in the auditorium, still leaving plenty of room for the entertainment programs which are being featured.

Contributions made yesterday, supplementing the long lists carried in previous issues of The Star, included a ladies' skirt from the Matthews Stores, Inc., a rug from the Grand Union Tea company, \$10 worth of candy from Keadyland, \$25 in candy and sugar from Brenna's Grocery, and chickens from Mr. Rork.

From Patrick Friery of Chaserville

Mrs. L. P. Butts is providing the table decorations for the supper.

The Entertainment Features

Following the conclusion of the supper, a welcome was extended by E. M. Konan, president of the bazaar, in which, with much pleasantry, he opened the benefit sale and entertainment of the week.

The new curtain at the stage of the auditorium came in for a full measure of praise last evening, the work of E. C. Angiano of Seneca, representing the handling of Columbus in America, not only very well done, but bearing out all of the historical features of the landing.

C. R. McCarthy presided over the entertainment program which included besides several numbers presented by young ladies under the direction of Mrs. Louise Hanlon Clark of this city, numbers from a delegation from Little Falls. Further mention of the local talent productions will be made in The Star of Wednesday.

George Daley, who led the visiting delegation, rendered a number of tenor solos, which were very well received, and which called for many encores. The piano solos of Mr. Donovan were also warmly applauded and brought their full share of pleasure to the crowd.

The clog dancing of Collin and Doran, though, received perhaps the most attention, their novelty steps being largely unknown to most of the audience.

Another Big Program Tonight

A delegation of entertainers from Hion will assist the members of the local parish this evening, and a number of specialties are promised, not only on their part, but from the Oneonta talent.

A superb spread ham supper will be served by the ladies, the menu for which will be found in another column of this issue of The Star, again for the price of fifty cents.

And the booths will be even more active this evening, with those in charge working even harder than last night. Vaudeville stunts, and a full line of truly pleasing conversation are always to be found there, for from the least entertaining features of the bazaar.

At the Holloway Church

Tomorrow night at half past seven o'clock, Rev. E. Hanna of Kingswood, N. Y., will speak at the Pilgrim Holloway church, 60 Valleyview street, in the presence of the Bethel Orphan's home. This is the Holloway church orphanage and all are urged to attend and learn about it.

Pay Sale—Fifty acre alfalfa farm, 11 level pond, near village and city, splendid buildings. Price \$5,250. Terms can be arranged. Alfred Sutch, real estate agent, 151 Main street, Phone 516-W.

It's surprising how much better you will get on with some of the better grades of coffee. You'll find Kipsnochie high-grade coffee fresh and better where you buy it.

Remember you can get better milk as well as sweet milk and cream at Palmer's grocery.

Shred 9c, 10c and 12c a loaf at 221 1/2 Central street.

700 MUCH POLITICS

General Manager Lores says That Business Men Have Suffered by Senate Investigation.

General Manager Lores of the D. & H. on his visit to Washington last week was interviewed by a representative of the Binghamton Press and what he said will be of interest to all Star readers:

"Business is so affected by the Senate investigation in Washington that most business men are not buying in quantities and railroads feel the shortage of freight, according to J. T. Lores, vice president and general manager of the D. & H. railroad, who was here today inspecting the property and equipment."

"Heads of businesses do not believe that all men in public office are dishonest, but they do not understand the situation and until the investigation ends they are wary and will not stock, fearing change in prices."

Mr. Lores told the Binghamton Press: "He said the slump is felt directly by the railroad."

"We easily see the damage the investigation causes business," the official visitor said. "The loss comes in shipments. Formerly buyers bought in carload lots, but now the majority of shipments are only partly carloads. Business houses buy just enough to keep a fair stock."

"I do not condemn the senate committee for its investigation; in fact, I am pleased to see the thoroughness of it. The entire country is sure to profit by it for much of the graft will be eliminated. Proper officials in office henceforth will realize that they cannot afford to be dishonest and business men will regain confidence."

"Conditions in the business world might be considerably worse. While the railroads feel the effect they are confident that relief will come soon and business of the last year will be re-established and the troubled waters will be oiled and smoothed. Business should increase on an average of 6 per cent each year, but the war brought abnormal increases and high wages."

"Another condition affecting the railroads is the less buying of coal for consumption next winter. The consumer probably realizes that there is plenty of coal above ground and a sufficient supply will be available next fall. The consumer also believes his money will do him as much good as it will the dealer and operator. Many undoubtedly await indications for a decrease in price of coal, but this is unforeseen."

When asked about the condition of the D. & H., Mr. Lores said that he is satisfied. He said that equipment is in excellent shape and the railroad is prepared for any rush business that may come with the summer.

Why Not Lock Business Place Doors

Thus far this month 46 doors of business places have been found locked by officers of the police department and either the doors were locked or the occupant notified. In January 54 were found in this condition; in February, 40; and in March 30.

Ladies' Guild to Meet

The Ladies' guild of the Baptist church will meet with Mrs. J. D. Gridgley at 7:30 o'clock.

noon, May 7th. Officers are to be elected and it is hoped that there will be a large attendance. Refreshments will be served.

WHAT DO CLOTHES MEAN IN YOUR LIFE?

Copyright, 1934, Max Schuster & Sons

Clothes are likely to be just an incident with most men—but they ought to be a very important matter.

You'll agree to it too if you'll stop to think of the important things good clothes do for you.

Doesn't a man have to have confidence in himself to succeed? Good clothes help to create it.

Doesn't a man have to have the confidence of others to get very far in life? Good clothes get that for you.

Is it important to make good first impressions? Good clothes again.

Is it worth while to have pride in yourself and in your appearance? You can't have it without good clothes.

Good clothes influence your thoughts, your acts, your success.

Two top coat styles are shown above; both good ones. You'll see them on well dressed men for spring.

Mary Succeeds on Main Street

By LAURA MILLER

D. 1933, by Laura Miller

GOTHAM, SHORT-CHANGE ARTIST

Are you more interested in people or things? Would you rather accumulate friends or dollar bills? That is practically the way a successful young woman lawyer puts the question of city vs. town. The town, she is sure, offers more friendships. The city may give you a higher pile of cash—if you succeed above the average. Otherwise the city short-changes you both ways, she believes.

If actions speak louder than words, it is significant that Beulah Newsum, A. B., A. M., LL. B., Phi Beta Kappa (that's the scholarship one, you know), national president of Kappa Alpha Theta (that's a social one that's said to take in only brains plus good looks), moved from Washington to Oklahoma City and Oklahoma City to Hot Springs, Ark.

The moves were dictated by anything but fear of failure. In Washington, Miss Newsum, with all her degrees accumulated before she was twenty-four, became a member of a successful firm and was made an associate member of the legal and advisory war board of the city.

In Oklahoma City, a place on the state Democratic speakers' bureau, an income above the average salary, a practice that brought her "warmth of reception and genuine interest," are a few of the early successes attained.

The story in Hot Springs is, she says, "just beginning to be made." A digest of Arkansas laws is on the program for the near future. Her fellow townsmen describe her as "a woman who has won a place for not only herself, but for other women in public affairs. Though yet in her twenties, she is one of the best-informed citizens of the entire country on topics of the day and national and international affairs. Withal she is a winsome, womanly girl, and enjoys the good times of her home club as well as the more serious affairs of her public career."

TO MAKE MAN LIKE AUTO

Scientist Says Humans Will Be Turned Out Like Cars.

Max Thorek, the Vienna scientist who has become famous for his experiments in transplanting animal eyes, is also an expert in transplanting glands. But in recent lectures he has discouraged the idea that old men be made young again without fail.

He says it is sometimes possible now to improve the physical condition of persons who become old before their time, and declared that his experiments with dogs and rats have persuaded him it may be possible some day to construct men or the new construct engines and motor cars.

Sun's Radiant Energy.

If the radiant energy of the sun falling on the earth were wholly converted into mechanical energy, each individual's share would be sufficient to lift a weight of 3,300 pounds through a vertical distance of nearly 20 miles every minute of his life.

The COTTAGE GARDENER

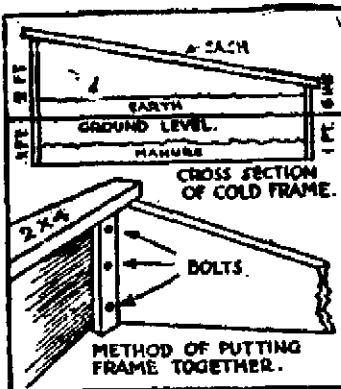

Under-Glass Plan for Young Plants

Protection That Speeds Up
Growth and Produces
Sturdy Sprouts.

Glass, even if it be only a fragment of a window pane with which to cover a small seed box, or an old tumbler to set over a cutting in a flower pot, is one of the essential materials of a plant grower in climates where there is frost.

French gardeners raise acres of plants under "cloches," or bell-shaped glasses of various sizes, which set over the individual plants to speed up growth. Wonderful lettuce is grown this way.

Glass keeps the heat in and the cold out, while letting in sunlight. This is the chief principle of the hotbed, which is an essential institution in a garden of any extent. The heat usually furnished by fermenting horse manure is conserved and fostered by

the blanket of nonconducting glass, which does not allow it to escape rapidly by radiation as would metal, or even wood.

When a hotbed cannot be maintained conveniently because of the difficulty of securing a supply of fresh horse manure as its foundation, a difficulty that is becoming more real each year, a coldframe or heatless hotbed can be used as a substitute, although it cannot be utilized for a month or six weeks after the hotbed usually is at work.

Hotbeds may be artificially heated by steam or hot water pipes, but only a few gardeners will be able to afford such a luxury or will have a location to permit it being used conveniently.

The construction of a hotbed is not at all complicated. To do so, a frame built to accommodate a glass cover may be used, provided it is of sufficient extent to encourage fermentation of manure. While it is best to use the standard-sized hotbed sash sold by all dealers, which are 6 feet by 3 feet each, old window sash may be utilized for the purpose.

Knockdown frames to hold this sash are sometimes sold, but they can be manufactured by any carpenter or by the gardener himself if he is at all handy in the use of hammer, saw and nails. The usual unit is 6 feet 2 to 3 inches by 6 feet, accommodating two standard sashes. The extra inches are necessary to permit of the placing of a cross strip between the sashes upon which their inner edges may rest firmly. This crosspiece usually is grooved so that any moisture that may seep between the edges of the sash and the crosspiece would drain down the groove and not drip into the bed beneath.

If the bed is to be permanently located it is best to make the frame of heavy lumber, 2-inch stuff that may be bolted together with angle irons in the corners. If it is to be temporary, lighter lumber is available, and it is

SECTION OF COLD FRAME SHOWING PLANTS GROWING DURING WINTER MONTHS.

lighter to move and handle without knocking down the frame. The back of the sash should be 14 inches high, and the front 6 inches to 10 inches. Some types are 12 to 15 inches high at the back and 8 to 10 inches in the front. These, however, are only useful for seedlings and low growing plants. The taller type will keep the plants until they have attained considerable height and is also available for a coldframe in which plants from 6 to 10 inches may be wintered.

A frame should always face the south, with no houses, trees, or other objects to cast a shadow over it or cut off the sun. If sloping land can be secured for the frame it is an added advantage. If the land slopes to the south, as it will give more direct rays of the sun upon the glass.—National Garden Bureau.

Not So Bitter Around.

What has become of the old-fashioned "bitter" that was so common in "bitter" this or that public utility?

Fifty-Fifty.

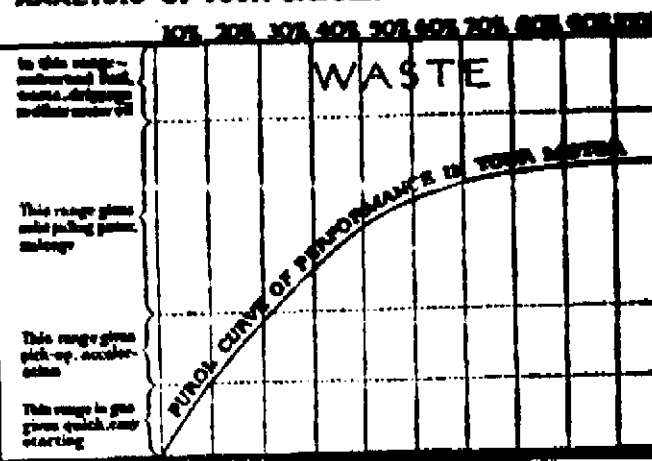

People who marry for money don't seem to get what they married for, and neither do all those who marry for love.

FREE:

Important book on motor power. Send coupon.

ANALYSIS OF YOUR GASOLINE IN PERCENTAGES

Get more power—yet save 30% on gas!

Engineers prove this possible
for any car. Two years of tests

Your motor is rated for certain power.

Now you can have it. Power—speed—flexibility. New pleasure for driving.

And save 30% of what gas costs you a year!

Note curve on chart

In the chart above we give you two important bits of information. Note the column of type at left-hand side of the chart. That tells the requirements gas must meet to give real power, real flexibility. Because all gas is made up of combustible units. The first 10% of them should give quick starting. The second 10%—flying pick-up. The rest, solid pulling-power, speed, mileage.

Now note how the curve of PUROL performance coincides at every point with the ideal requirements! It gives the combustible units needed. That's because it is refined to specifications built on actual motor needs.

30% engine proved

Gas that gives full power also reduces upkeep in general. And the other way around. For two years our engineers have tested PUROL—in 35 different cars. Records of these tests prove:

That PUROL gives 3.3% greater mileage. That PUROL burns cleanly—saving 14.2% of the fuel that usually drips down into the crankcase. That is the way PUROL saves \$2.98 a year on lubricating oil. And through the greater efficiency of undiluted lubricating oil, saves \$10.33 a year in general repairs.

The average car used 500 gallons of gasoline a year. Thus the first two PUROL savings—87% gallons at 20c—are \$17.50. The four together show a yearly saving of \$30.81. 30% of the average gasoline expense!

Now you make a test

In a year PUROL will show you a saving of 30%. But you can test its greater power-performance in an hour's driving. Make such a test next time you need gas. You'll fairly feel the new response from your motor.

Get PUROL at any Pure Oil Service Station, or of any Pure Oil dealer. You'll know them by the pump's pattern. Pure Oil blue.

And PUROL quality never varies. Whenever or wherever you get it, you'll get this same efficient performance.

PUROL GASOLINE

This latest photo of John D. Rockefeller, Jr., was snapped when he appeared at the Rockefeller church for Easter service.

CLEAN DISHES GUARD HEALTH

Influenza and Colds Especially Likely to Be Spread by Poorly Scrubbed Utensils.

Ithaca, Apr. 22.—Before you wash.

This is one of the first rules for the dishwasher who would do her work quickly and well, say the household specialists at the state college here.

Stacking the various dishes according to their kind, is another point emphasized. Scrubbing and stacking, they say, not only save time and motion in washing, but also in arranging for rinsing and scalding and in putting them away. A large size rubber scraper is advised, though some women prefer to use pieces of paper toweling or newspaper, or other old unglazed paper.

"Plenty of soap should be used," the statement continues, "and if the water is hard, borax or a very little salt soda will help the soap to mix well with the grease from the dishes. The water must be as hot as the hands can stand; it should be changed several times if there are many dishes, even though it may still look clean."

"Finally, the dishes should be rinsed in boiling water, or, better yet, placed on a draining rack in a pan and scalded with boiling water, and left to dry without wiping. Glasses and silver may need a little polishing."

Colds and Dishwashing.

"The need for all this care has been shown by some experiments carried on under Dr. Jean Broadhurst of Teachers' college, Columbia university, in which it was proved that colds, influenza and other respiratory diseases may spread by carelessly washed dishes. These experiments showed that even washing dishes in warm soapy water till they looked clean was not sufficient, and that the rinsing or scalding water must be close to boiling. Fine china is not injured, either in its glaze or its decoration, by hot water. When scalding glass of unequal thickness it is better to put in a pan of warm water and gradually heat it to the boiling point.

"The connection between dishwashing and the spread of influenza is strikingly shown by some figures from army camps. It was found among the troops where the dishes were washed without boiling water that the influenza rate was 252 a thousand, while it was 51 a thousand among those where they were properly washed, and that 89 per cent of the influenza cases occurred among the former troops."

For Sale—Seven room house, all improvements, newly painted and papered. All ready to move in. Price \$4,100. Easy terms. Alfred Sutch, real estate agency, 151 Main street, Phone 930-W. advt 21

HEIRS OF AN INDIAN CHIEF ASK \$100,000

Small Amount Deposited in 1859 Grown to Fortune.

St. Paul, Minn.—For more than 60 years the spirit of Chief Crow, Sioux Indian chieftain, has rested peacefully in the tepees of his warriors, but his dealings with the white man still bear fruit.

A son and daughter and granddaughter of Chief Little Crow today are seeking to establish the claim to the principal and interest on \$2,000 which was deposited in the First National bank of this city. The warlike chief subsequently left the peace councils and took the warpath against the encroaching whites. He became an outlaw and his money in the bank never was touched. It is claimed.

Odd Story of Lost Legacy. The certificate of deposit still is in existence, and the money with its thousands of dollars in accumulated interest is waiting possession, according to Mrs. G. Blue Cloud of Minneapolis, a granddaughter and heir to Chief Little Crow.

It is a long and strange story of a lost legacy Mrs. Blue Cloud tells, a legacy born of war, massacre and bloody Indian trails.

The legacy now amounts approximately to \$100,000 with interest compounded annually at 4 per cent, it has been estimated.

Following the treaty of 1851, in which lands west of the Mississippi river were ceded to the United States by the Indians, Chief Little Crow received a government allotment of \$2,000. This was deposited in the First National bank of this city in 1852, Mrs. Blue Cloud says.

Gave Certificate to Friends. "The death of Chief Little Crow occurred in 1863, after the massacre of 1862," Mrs. Blue Cloud explained. "He left a certificate of deposit in the hands of friends. Later it was turned over to friends of the chief, and now, we believe, is in the possession of a grandnephew of the chief. His name is Henry Westman and he lives in Santee, Neb."

Eight years ago, according to Mrs. Blue Cloud, proceedings were started in Nebraska to clear up claims to the deposit certificate. Moses Wakeman and Hannah Red Earth, both of Peever, S. D., son and daughter of Chief Little Crow and Mrs. Blue Cloud, granddaughter, made claims as preferential heirs. The investigation dragged for several years, but nothing came of it. Mrs. Blue Cloud claims the certificate of deposit is still in possession of Mr. Westman.

Many weary months has Mrs. Blue Cloud passed in her efforts to establish the claims of herself and the uncle and aunt in Peever. Her own home is in Granite Falls, Minn., but she has come to the Twin Cities where she has made a living doing Indian beadwork.

Chief Little Crow was born near the present site of this city in the Indian village of Kaposia. He was chief of the Kaposia tribe. At first he followed the footsteps of his father and lived at peace with the white man. After the treaty of 1851 he began to manifest a spirit of restlessness and a growing feeling of hatred for the whites. Finally he joined an uprising in 1862, when the Indians left the reservation allotted to them in northern Minnesota. There was a general massacre of the whites August 18, 1862, in which 1,000 were slain. The Indians were defeated and dispersed by Gen. Henry W. Sibley at Wood Lake, Minn., September 23, 1862. Little Crow fled with a small band to Canada. Believing it was his duty to his tribesmen he returned in 1863 and led a war party of Indians into Minnesota. A white settler and his son shot Little Crow to death at Hutchinson, Minn., receiving a reward of \$1,000, which had been placed on his head.

The chief's scalp was taken and is now in the collection of the Minnesota State Historical society.

Wisconsin Blacksmith Becomes Inventor at 75

Platteville, Wis.—John Piquette, aged seventy-five, veteran blacksmith and known far and wide as a shaver of race horses, has invented a tool machine for sharpening hard steel used in bars and drills in the zinc mines. It is very simple in construction, a steel wheel driven by a power shaft doing the work. Last Christmas Mr. and Mrs. Piquette celebrated their wedding. He works at the anvil every day.

Bird Guilty of Arson

Charleston, W. Va.—George Sharp's McCormick street residence was slightly damaged by a blaze. "Do you know what caused the fire?" a fire department lieutenant asked Sharp. Sharp didn't, but one of his children did. An inquisitive bird pulled a string from a burning trash pile and flew to its nest in an eave of the house.

U. S. Rich in Cattle

Washington.—Over one-sixth of the world's cattle are in the United States. Even so, North America, except during the war, has been producing less than enough to supply its own needs.

Women Act as Constables

Lincoln, O.—The old days when town constables were chosen because of the length of their mustaches have gone. Their disappearance is attributed to the primary voting system.

Teachers Men Curious

Teachers men may have as much curiosity as anybody, but they ask no questions and leave it ungratified.

Get Rich Quick Schemes

All the arguments against "get-rich-quick" are likely to crumble. People do it right along.

FEAR OVER-PRODUCTION

St. Paul for Red and White Kidney Beans in New York State Called "excessive and limited."

A fear of over-production of red kidney beans and white kidney beans is pointed out by the state college of agriculture at Ithaca. In spite of the high prices prevailing for these types, the market outlet for them is felt to be "rather specific and limited." On the contrary, the market for peas, medium and white narrows, is fairly stable.

Red kidney and white kidney beans may be advisable where soil and seasonal conditions are favorable and where the market outlet is fairly well assured in advance," says the statement issued by the college.

Over-production of peas, a popular state and this is the type produced mainly in the bean belt, where the Michigan robust mosaic resistant strain is being generally adopted. Growers outside of that area are using outside variety and red kidney varieties. The yellow eye is naturally a good variety and quite resistant to most bean diseases. The Wells strain of red kidney resistant to anthracnose is rapidly replacing common strains of this variety.

"Considerable seed of all of the above varieties is available this year. The Nova Scotia strain of white marrow, supposedly disease resistant, has replaced the common strains in several regions but is still more or less unknown. Known for its anthracnose resistance, the result of a cross between a white, yellow eye marrow and the Wells red kidney, will not be on the market for another year."

Pleasant Odor of Wasp Nest

There is a tropical wasp that builds nests which, if crushed, smell like sherry vinegar, and several other insects have equally pleasant odors.

Serving Wild Birds Unlawful

The serving of the flesh of wild birds protected by the migratory bird treaty act with meals in hotels, restaurants or other places is unlawful.

HOMESPUN YARNS

Aunt Ada's Armoire: Homespun based on cooperation are the ones least likely to be visited by family trouble.

Why not have sharp tools in the kitchen? A small emery wheel on the kitchen shelf will pay for its cost many times over.

One of the weakest points in home life in the present day is the lack of understanding of human relationship.—Flora Rose.

Maybe the vacuum cleaner is out of reach in price, but one home convenience that costs little is a better measuring cup than the old cracked teacup which has lost its handle.

Soon it will be mosquito killing time. Learn how in 11 1/2, a free pamphlet, from the state college at Ithaca, on household insects.

DENIES DIVORCE FACT RUMORS.

New York, Apr. 22.—Robert J. Sanderson, husband of Nina Wilcox Putnam, authoress, formally and publicly declared Sunday that the allegations of affection charges with which his wife's name was linked last summer were utterly false.

The charges to which he referred concerned an alleged divorce suit. The authoress was supposed to divorce Sanderson to marry a wealthy New York society figure, Ellsworth Bassett, of Madison, Conn., who was to divorce Mrs. Bassett in the meantime.

Dangerous Varicose Veins Can Be Reduced

Never mind what people say. If you have varicose or swollen veins and want to reduce them to normal, go to Stader's drug store and ask for an original two-ounce bottle of Eucalypti Oil (Eucalypti). If he hasn't it, he can get it. Apply it to the enlarged veins as directed and improvement will be noticed in a few days. Continue its use until veins return to normal size. It is guaranteed to reduce swollen veins of money back, and also to reduce swollen glands, goitre, and warts.

NEW STAMP ISSUE COMING

Post. I authorize to Commemorate the Anniversary of the Landing of Walloons in New York.

Stamp collectors of Oneonta and vicinity will soon be favored with a new issue about to be put in circulation by the postal authorities which will commemorate the 300th anniversary of the setting of the Walloons in New Netherlands, now the state of New York.

The stamps, rectangular in shape, are issued in three denominations, one, two and five-cent.

The one-cent stamp, printed in green, has for its central design a view of the ship "New Netherlands," on which the Walloons sailed. The two-cent stamp, printed in red, represents the landing of the Walloons at Albany, and the five-cent stamp, printed in blue, represents a marker located at Mayport, Fla., showing the landing place of one colony of Walloons.

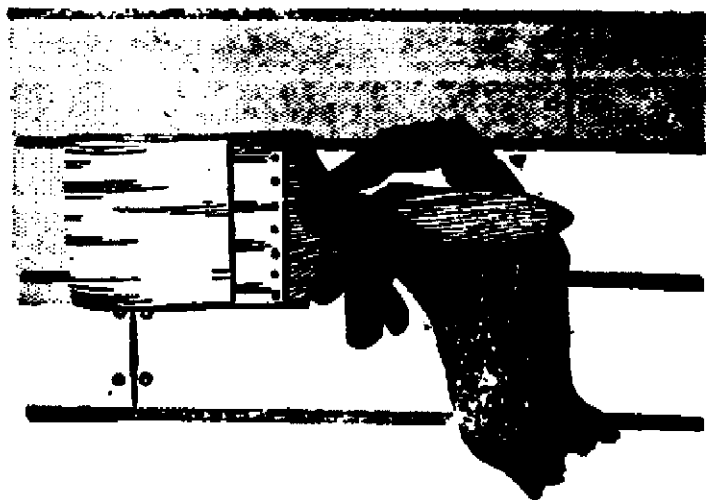

The surrounding design of the three denominations is identical. Above the central design, is a semi-circular panel with the words, "Huguenot - Walloon Tercentenary." In both upper corners are ribbon scrolls bearing "1624" and "1924."

SMITH APPROVES HOME RULE AND MOTOR VEHICLE BILLS

Albany, Apr. 22.—With the approval by Governor Smith Friday of the home rule enabling act applying to cities of the state, the administration motor vehicle bill, and the supplemental appropriation bill carrying a total appropriation of \$1,109,000, virtually all the more important general measures sent to the governor during the closing hours of the recent legislative session have been enacted into law.

A list made public Friday of the measures signed during the past 48 hours contains 66 new laws, of which 22 were signed today. Practically all appropriation bills have been approved.

They Wouldn't All Fit in a Ford

Maybe the task of rearing 11 children gave Major Frank B. Gilmore considerable experience in puzzling problems—at any rate he has just been elected to the Masaryk Academy of Work at Prague, Czechoslovakia, the highest scientific honor within the gift of that progressive new republic. Major Gilmore, and his family, are shown packed into the family "carryall" at Montclair, N. J.

Judge Orders Defeated
Wooer to Kiss the Bride

New York.—Eddie Bransfield, taxi driver, wants the girls to know he is still single, though no longer unloved. For two years Eddie wooed Edna Maxwell, an attractive dancing teacher. Recently Charles Ray, a seaman of the New York, in a spick-and-span uniform met Miss Maxwell and wooed and won her. They were married a few days later.

Endeavoring to win her back from Ray with a wicked-looking disk, Eddie found himself in the West Side court on various charges. Magistrate listened to Eddie's story.

"Well, she's married now, so you'd better put that knife away," said the court. "I sentence you to kiss the bride and live with her luck."

Eddie lives at 127 East One Hundred and Second street.

Woman Invented Paper Bag

The square-bottom paper bag, which has been in almost universal use for half a century, was the invention of a young woman—Miss Maggie Knight, a resident of Holbrook, Mass.

Origin of "Cat's-Paw"

There is a fable in which a monkey used a cat's paw to draw roast chestnuts from the fire. This fanciful tale gave rise to the use of the term "cat's-paw" for dupe or tool.

Fortitude

True fortitude I take to be the quiet possession of man's self, and undisturbed doing of his duty, whatever evil befalls or danger lies in the way.—Locke.

Says Methuselah
Died Too Soon

New York.—The cost of sickness in the United States yearly amounts to \$2,000,000,000, former Health Commissioner Partridge recently told the Rotary club of New York in the McAlpin hotel. He asserted it was possible to live 80 score years.

"Nearly every one dies prematurely," he declared. "Vital statistics show 4 per cent of our population die of old age and the 96 per cent prematurely. Investigation of the 4 per cent even shows that they might have lived longer."

"Even Methuselah died prematurely. He was drowned by the flood when 969 years old."

Dog Plunges Into Well in
Vain Attempt to Save Boy

Peoria, Ill.—Faithful efforts of "Buddie," a fox terrier dog, failed to save the life of four-year-old Hartrell Kellenberger of Peoria, and the boy was drowned in a well.

The dog plunged into the well after the boy had fallen and strove desperately to save him, clawing at him and tearing at his clothing in an effort to pull him up from the water. The dog later was pulled out and was revived by artificial respiration. He had a broken leg.

Who Was Caliban?

In Shakespeare's "Tempest" Caliban is a savage, deformed slave—half beast, half man—in the service of Prospero, the magician. He was the offspring of Sycorax, a foul hag banished from Argier (or Algiers) to the enchanted island, afterwards inhabited by Prospero. The word Caliban is sometimes used to denote anything monstrous or evil.

Dynamite Smuggling Is
Gaining in Philippines

Manila.—Smuggling of dynamite from British North Borneo into the Sulu archipelago is increasing, despite the efforts of the Philippine customs authorities. The dynamite is chiefly used by the Moros to kill fish in the waters of the Southern Islands, although the practice has been prohibited by law for many years.

The Moros, who are familiar with all the small coves and harbors, are able to evade the customs authorities, who have only a limited patrol service in that region. In their fast vintas (sailing boats) the Moros are able to load their cargoes of dynamite, on the Borneo coast and under cover of darkness, slip across to one of the small islands in the Sulu group, only a few miles away.

Only in rare instances are these smugglers caught, customs officials say.

Aliens Are Made Citizens
at Rate of 15 Per Minute

New York.—Naturalization of aliens at the rate of 15 per minute continues in the county courthouse, where six justices are aiding County Clerk Donegan to give 5,000 candidates their final papers before the duties of naturalization are transferred to the federal bureau.

Paris Thief Loses Kit

Paris.—An attempt to steal the international standard meter was foiled by the janitor of the international weights and measures bureau. The burglar managed to escape over a fence, leaving an elaborate kit of tools behind.

Ships Bring Large Tusks

Tacoma.—Ships from the Orient are bringing many ivory tusks of mammoths, whose remains lie in the frozen wastes of Siberia. The tusks are the principal center of the ivory industry. In this country the ivory is used for billiard balls, inlaid work and handles.

VITAMIN DISCOVERY
AID TO SCIENTISTSSee Possibility of Producing
Nutritive Food.

New York.—Unusual interest has been aroused in medical circles by the announcement of Dr. Walter H. Eddy, professor of physiological chemistry in teachers' college, Columbia university, of the first isolation of any of the five known vitamins. Dr. Eddy and his associates believe that isolation of vitamin D or, as Dr. Eddy prefers, "biol," opens up the possibility of producing synthetic foods of a high nutritive value, though he warns patent medicine vendors in this respect.

Dr. Eddy told a distinguished body of scientists and physicians at the one hundred and thirty-eighth meeting of the Society for Experimental Biology and Medicine at Bellevue Hospital Medical college recently that he succeeded in isolating crystalline substance, which he believed to be chemically pure "biol." This substance was first described by Professor Wildier in 1909.

Produce Four Specimens.

Dr. Eddy acknowledged the assistance in the series of extensive experiments he has been making at Columbia that he has received from Dr. R. R. Williams, in charge of the chemical laboratories of the Western Electric company, and Dr. Ralph Kerr, an expert in organic chemistry at Columbia.

At Bellevue Hospital Medical college Dr. Eddy produced four specimens of the isolated vitamin in test tubes before the eyes of his audience. He announced at the same time that in four experiments 70 milligrams were produced from moist autolyzed yeast. So far only a partial analysis has been made. The known composition of the substance is 48 per cent carbon, 25 per cent nitrogen, and 8 per cent hydrogen. Further experiments will be made at Columbia to determine the composition of the remaining 24 per cent.

In a supplementary statement Dr. Eddy remarks:

"Interest in the subject was revived in 1916 by Dr. Williams, who suggested that biol was actually vitamin B."

"Extracts of substances known to be rich in B were shown by him to have the power of stimulating yeast growth, and Dr. Williams devised a test based on the use of yeast stimulation as a means of measuring the vitamin B content of substances. When this test was submitted to further study discordant results developed."

Cure for Beri-Beri.

"The final outcome was that while most substances rich in vitamin B do stimulate yeast growth, the stimulation may be due to the presence of vitamin B, but to some other factor accidentally associated with it. In 1922 Dr. Casimir Funk was able to show that when an extract rich in B was subjected to a process of distillation earth would remove all of the power of the extract to cure beri-beri (a property exclusively related to B), but did not remove the yeast growth stimulation factor. Funk interpreted his results to indicate that such extracts contained two vitamins, one the antineuritic factor for which he proposed to retain the name B and the yeast growth factor which he called vitamin D."

"This suggestion of Funk's originated a controversy in which various investigators, including Dr. Fulmer of Iowa, have taken part. These investigators have attempted to show that the yeast growth factor, while highly stimulatory to yeast growth, is not essential to its growth. They would reserve the term vitamin to substances producing growth, but limit it to such as were absolutely essential to growth. Others, among them Dr. McCollum of Johns Hopkins university, believe the term vitamin should be restricted to such factors as are essential to mammalian nutrition. For these and other reasons the yeast growth factor has been described under the two names, Fulmer, McCollum, etc., holding it better to retain the name originally given it by Wildier, viz, biol."

Small Oily Fish Used
by Japanese as Candles

Vancouver, B. C.—Japanese fishermen are reaping a harvest in fishing for oilfishes this year, as there has been a good market established in the poorer districts of Japan for these fish for candle purposes.

"Oilfishes are these little fish that run in only two rivers on the coast of British Columbia, the Nass and the Fraser river, that when they are dried and stuck on a piece of tin they will burn for hours and give a better light than the ordinary candle."

At one time the Indians used no other lights but candle fish.

Belgium Sends Stones to
Canada as War Memorial

Brussels.—In fulfillment of a request from the City of Ottawa, the city of Louvain is sending to Canada stones from the ruins of the Louvain library and other historic buildings for use in a war memorial to Canadian soldiers who fell in France and Belgium.

The Belgian memorial to Canadians killed in October, 1918, during construction of a bridge for the transport of British troops over the Ise river, near Coirel, will be dedicated soon. It will be composed of large blocks of granite quarried by the State of a Canadian mine.

Jews Used Fireless Cooker

It is impossible to say exactly where the principle of the fireless cooker originated. It was known to the Jews many centuries ago, who used large of stoves for roasting. Another is said to be the name of the boy who, while in immediate proximity of the stove, in the kitchen of a

THIS WOMAN'S
MARVELLOUS
RECOVERY

All Due to Lydia E. Pinkham's Vegetable Compound

Truman, Minn.—"I was badly run-down, had pains in my side and back; sometimes I could hardly move around in bed. My husband got me Lydia E. Pinkham's Vegetable Compound, and after taking it I was so much better I could do my work again. I do my housework, have a garden, raise chickens, and in harvest time I worked in the field and helped pick corn. Sometimes I do chores and milk. I took the Vegetable Compound before and after my four-months-old baby was born, and it has always helped me wonderfully. I believe there is no better medicine made for women, and I hope every woman will give it a fair trial."—Mrs. AUGUST R. WINTERHOUT, R. No. 2, Box 84, Truman, Minn.

Women suffering from troubles so common to their sex should give Lydia E. Pinkham's Vegetable Compound a fair trial.

The Lydia E. Pinkham's Vegetable Compound has relieved women of such troubles for the past fifty years. For sale by druggists everywhere.

What Human Heart Does
Described by Scientist

Minneapolis, Minn.—"The successful experiment reported in the newspapers recently in which heartbeats broadcast from St. Louis were plainly heard at Fort Bayard, N. M., a distance of 1,200 miles, while of much interest," said one of the world's most famous anatomists of the famous Rochester, Minn., clinic, "is overshadowed by contemplation of the work done by this vital organ. Here are a few of its wonderful performances put in terms the layman will immediately grasp:

"The heart beats 72 times a minute, 4,320 times each hour, 103,680 every day, or 37,843,200 a year. At the age of fifty the heart has beat 1,802,100,000 times. The heart forces blood through about 2,000 miles of tubing at the rate of 10.9 gallons an hour, 259 gallons a day, 94,535 gallons a year, and in fifty years 4,725,750 gallons.

"In terms of power, the heart lifts what is equivalent to one ton in weight 50 feet in the air every day, five miles in a year, or 250 miles in 50 years."

What Would Chris Think?

"I wonder what Grandfather Christopher would think of America today," said Christopher Columbus IX. "If he could cross the Atlantic on the great Leviathan, see Panama and other wonders of the American continent he certainly would be thrilled." Christopher Columbus IX is a direct descendant of the ninth generation, known as the duke of Verreux.

New Half-Dollar Design Was Not U. S. Creation

Washington.—Treasury officials have placed responsibility for selecting the design of the half-dollar memorializing the tercentenary of New Netherlands and the arrival of the Huguenots in America, on the committee in charge of the tercentenary celebration and the Fine Arts commission.

Robert J. Grant, director of the mint, explained that the design was forwarded to him by the committee and was submitted by him to the commission, which returned it with one or two changes. It then was approved by them and Secretary Mellon.

Officials of the mint showed much interest in The World editorial recently quoting Doctor Zwerlein of Rochester as seeing "Protestant propaganda" in the fact the coin was stamped with the simulacra of William the Silent and Admiral Coligny.

Soldier Thought Dead, Returns to His Old Home

New Orleans.—Emanuel Barhart, one of the first 10,000 American soldiers to arrive in France, appeared recently at the home of his sister in Arabi, a suburb, and denied the authenticity of the War department's report that he had been killed in action. Relatives had heard nothing from him since shortly after he went overseas.

Don't Climb the Fun.
The Japanese do not climb mountains for the fun of the thing. When you find a Japanese making the ascent of Fuji, the sacred mountain, he is probably a pilgrim performing a pious duty, according to W. Weston, in the Geographical Magazine.

Woolen's Coat Quickly Whitens.
In cold countries where snow prevails during a long winter many animals change the hue of their coats to a white tint. The case of the weasel is especially curious; it retains its brown coat until the first snow appears, and then whitens in a few hours.

IS FOUND IN COLOMBIA

Cut Off From Neighboring Tribes Because of Their Practice of Magic.

An ancient civilization, cut off for centuries from other neighboring tribes because of their practice of magic and supposed supernatural powers, has been discovered in Colombia, South America, by J. Alden Mason, assistant curator of the Field Museum of Natural History at Chicago.

These people, a tribe of Indians, named Arhuacos, numbering 2,000 to 3,000 persons, occupy a narrow strip of land about 30 miles wide and extending back from the Caribbean sea 150 miles to snow-capped mountains. Short of stature, with dark olive complexion and black hair, which is in contrast to their tall and powerful neighbors, they lead a quiet, peaceful existence untroubled by any modern problems. Their laws and customs are well established and their language is separate and fully developed.

Their isolation has become such a matter of course that they are unknown even in the nearby coastal towns, while the other Indian tribes will not admit their existence. Only two white men have ever penetrated their land to study their customs and traditions.

They live principally by agriculture, their haphazard farms ranging from the mountains, where they raise sweet potatoes, to the tropic lowlands near the sea, where they grow plantain, sugar cane and yuca.

A queer marriage custom is observed. When a man decides to marry he builds for his bride a house in the village, but after the marriage ceremony he never again enters the home. He appears at mealtime for his food which is passed out the door, and he then retires to his club to eat in company with his fellow men.

Much of their spare time is spent in a mutual delousing process, a sort of community interest being established by this practice, and everyone chews a mixture of coca leaves and lime, the narcotic effect of this raw cocaine placing them in a state of lethargic bliss.

Their old religion is a form of nature worship, the lakes, trees and ponds being their principal gods. The lodge dances are grotesque mask affairs, accompanied by a slow rhythmic music. Their creed of living is simple in the extreme.

While their tall, lighter-skinned neighbors are highly civilized, this tribe has practiced magic for centuries and this is believed by Mr. Mason to be one of the reasons for their isolation. Mr. Mason, who recently returned, made the visit to the Arhuacos accompanied by two members of a nearby tribe who had been induced to admit their existence. While the Arhuacos were not hostile they refused to have anything to do with his party.

Andorra's Strong Box

Six iron locks, connected by an iron chain, guard a massive chest in the council hall of the little republic of Andorra, on the southern slope of the Pyrenees. A consul from each of the six parishes has a key, and the locks cannot all be opened unless the six consuls are present. No stranger is permitted to see the contents of the box, but they are supposed to be sheets of lead upon which is written the charter granted by Charlemagne.

Cellulose Best for Blotters

Blotting paper made from cellulose batting is said to register an absorption index of 135, while that made from rags tallies 110.

Britain to Have Air
Defense 30,000 Feet High

An important scheme of air defense for Great Britain is being prepared by the air ministry and the war office at London under direction of Col. Edward B. Ashmore, who commanded London's defense during the war, according to the Daily Chronicle. The scheme comprises a sky defensive extending to more than 30,000 feet above the ground.

"Colonel Ashmore," says the newspaper, "will take great areas of the sky and so 'mine' and set and barrage them that from the earth level to an altitude of more than three miles no aerial raiders will find it possible to live and move therein, while above that will be an area of burning shells and other defensive measures. New squadrons of fleet air fighters will patrol the air to an altitude never before attained in aerial fighting."

The paper indicates that part of the defensive scheme is the formation of immense artificial cloud screens to hamper raiding aircraft, and says the means for creating such smoke paths now have reached a stage far beyond anything done during the war.

Women Clad in Burlap
Are Haled Into Court

Grotesquely clad in ragged burlap which was fastened to their bodies by hay wire, two elderly spinsters, well educated and reputed wealthy, were arraigned in police court at Clitham, Ont., charged with cruelty to animals.

They were Luella and Mary Ann Radmore, whom authorities lured away from their valuable 200-acre farm in Romney township, after having had to fire their guns into the air a score of times to frighten away the "evil spirits" the spinsters vowed lurked in the neighborhood.

The cruelty charges were based upon evidence that many sheep, hogs and cattle on the farm had died of starvation.

The sisters were sent to jail for a week to be examined for insanity.

Camels Trace Parentage

Camels enjoy the distinction of being the only domestic animals that cannot trace their parentage to any species existing in a wild state.

Pronunciation of English

It 3,000 miles from England affects our pronunciation of English in America so much, what must happen to the language in Australia?

Mail Picked Up in Flight by Hook from Plane

Mail is being picked up by British airplanes during flight in Mesopotamia. The pilot's attention is attracted by a signal.

ing device used during the war and consisting of pieces of cloth spread on the ground and moved in shallow fashion. The message is attached to a line tied to the tops of two poles about six feet high. The observer picks up the line by means of a hook dangled from the plane and the message is delivered as directed.

Shunk Is Friend of Farmer, Not His-Robot Robber

Next to the snail, the shunk is now the most important far-dwelling animal in the United States. In 1929, only 12,750 shunks of this little animal were sent to market. Then the supply began to increase until the second number of 1931, 600,000 shunks were sent to market. Consequently, the average price was as high as \$2.50, but in 1932, the top figure was \$1.00. Commercially considered, shunks are of great value to the farmer, the shunk being a great destroyer of about 100,000,000 insects in this country. Experts of the department of agriculture

that the shunk is the most maligned of all dumb creatures; that, in fact, it is the most gentle, the most harmless, and most easily domesticated of all wild things that harbor on the fringe of farm lands. It is not true, according to the statement, that they kill chickens, steal eggs, or bother with any of the live things on a farm. Grasshoppers and crickets form a large percentage of their diet.

Gasoline Has Fuel Rival in Vegetable Extract

As a substitute for gasoline, paraffin, a vegetable extract, first made in South Africa, is said to produce more power to the gallon when used as a motor fuel. Although mostly alcohol, the new fluid contains several other ingredients that give it valuable properties. It is claimed that a fire fed by it can be easily extinguished by water, making it an aid to safety.

Indoor Golf "Green" Returns Ball After Putt

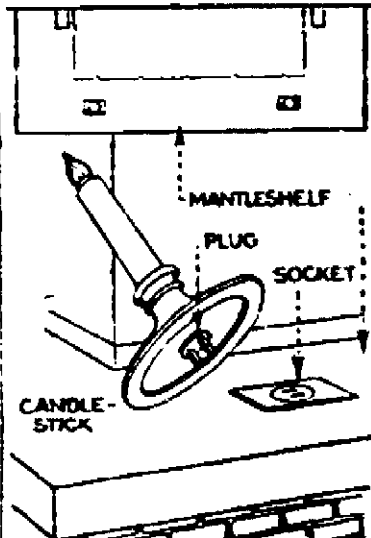

To aid golf players to attain accuracy in putting, an indoor "green" that directs the pellet back to the starting point has been invented by a western man. The toy can also be used as a pastime for any number of persons, and may be set up

on a lawn or other flat, smooth surface. When the sphere is struck it passes up an inclined plane, and if it does not drop through the cover hole, rolls back to the player. A channel at the side catches the ball, if it falls into the opening, and guides it out.

Wiring Mantel Candlesticks

The appearance of electrically lighted candlesticks on the mantels of a fireplace is usually marred by the lamp cord that connects the candlesticks to a near-by socket or receptacle. This cord can be eliminated entirely by wiring the mantel-shelf in a slightly different form than usual. This is done by providing a flush receptacle directly under the base of each

candlestick and wiring the candlestick as shown in the illustration, providing it with a cap to fit the receptacle. A hole is drilled in the center of the base to receive the cap, which is first wired and pulled up into position by drawing the wire through the candlestick, and the other ends are then connected to the correct terminals.

Uses Lighting Circuit for Aerial with Distress Results

Don't attempt to use the lightest circuit on an antenna without first finding out the resistance of the wire. One man did, with the result that his hands were badly burned, and the fire department was called to render first aid to both man and house.

PURITY
The Food Ice Cream

A decade ago ice cream was considered a delicacy only to be served on special occasions. That was before the advent of PURITY Ice Cream, which is today accepted as one of the finest of foods. PURITY Ice Cream contains a high percentage of real fresh cream and other pure ingredients, each of them valuable food elements in themselves. One quart gives as much nutriment as a pound and a half of beefsteak, four pounds of tomatoes, one and a half pounds of green beans or peas, a dozen eggs, or three pounds of fish. PURITY Ice Cream is recommended by dietitians and is a part of the daily menu of thousands of families because it is cheaper to buy than many other foods, requires no preparation, and is mighty delicious to the taste.
